OBJECTIVES AND PHILOSOPHY OF ALFAFA

- Supply and sale the latest computer systems and accessories.
- Construct and install LAN (Local Area Network) and WAN (Wide Area Network).
- Provide technical and maintenance advices in field of computer systems, networks, software and preparation of technical feasibility studies.
- Provide Analysis, design and information systems development.
- Train and upgrade staff and conclude technical studies, and feasibility studies to various bodies.

Our Commitments are composed of:

- Provision of Excellent Service
- Fulfillment of diverse customer requirements
- Maintaining consistent expert delivery service
- Dedication to the reseller and trailer channel
- Proactively managing partnership by anticipating changes and providing innovative, flexible and cost effective strategies
- Creating programs and services that address our partner's changing needs

Through commitment, ALFAFA has become the preferred reseller choice for IT sources and computer solutions in Khartoum state as well as other states.

WHAT DOES SUCCESS MEANS TO ALFAFA?

Avoiding the problems by challenging the conventional concept that says errors are part of normal business operations. Success only comes when we conform to the requirements of those whom we serve. We believe that strong partnership is the key to a successful venture.

To achieve success we are committed to:

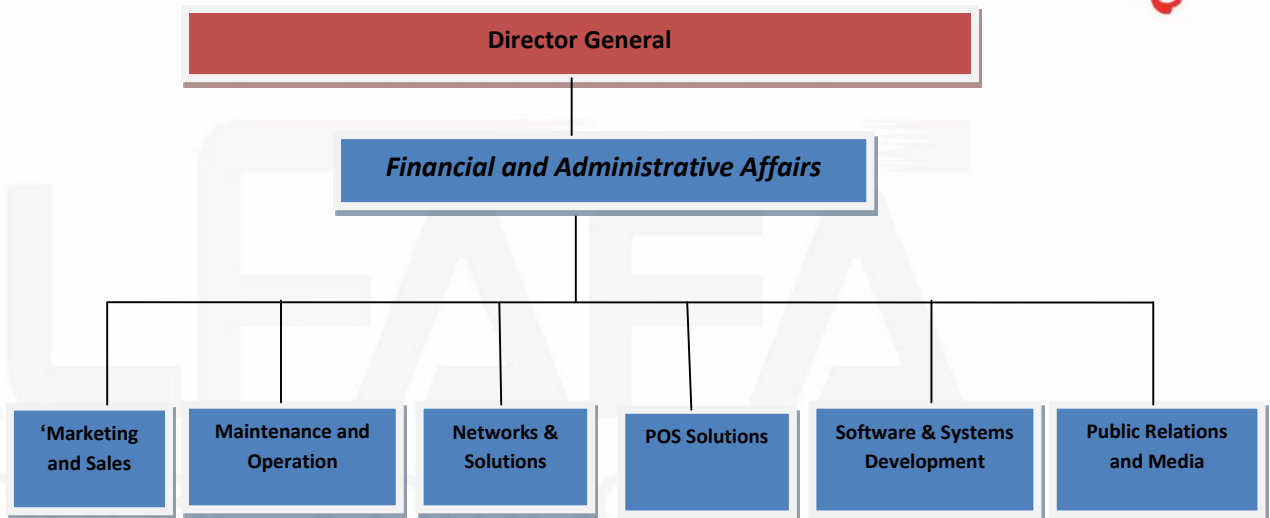

- Make every attempt to perform error – free work and exert 100% of the time for everyone we serve.
- Fully understand the requirements as well as the processes needed to do the job right the first time.
- Render quality and dedicate our efforts to customer's satisfaction.

Success for ALFAFA and Partners:

- We, ALFAFA and our customers, view our relation as a business partnership, not simply as a buyer and customer. We consider ourselves two business firms dedicated towards reaching a common goal.
- We understand the meaning of delivering quality service and the processes required to make the partnership work efficiently.

We understand that the quality of our work and the response of our team directly impact the value of the relationship between ALFAFA and partners

ADMINISTRATIVE STRUCTURE

ALFAFA'S DEPARTMENTS:

- Marketing and Sales
- Maintenance and Operation
- Network & Solutions
- Point Of Sales
- Software and System Development
- Financial and Administrative Affairs.

STAFF:

ALFAFA is accustomed to hiring highly efficient and dedicated employees who hold graduate and postgraduate degrees as well as experts and competent employees. They believe in our goals and work hard to achieve them.

The total number of our regular and irregular employees is 112, approximately.

ALFAFA renders technical advices in all technical fields, and prepares technical feasibility studies, designs network maps, gives integrated suggestions and offers solutions for all problems.

Fifth: Software

ALFAFA provides and supports a group of solutions needed by Market utilizing the latest technologies., concentrating on computer systems and software for various practical fields to fulfill the growing needs and requirements of technology Market

1-System Development

ALFAFA has developed a group of systems. In this regard, it commits to develop groups of systems on request. Furthermore, ALFAFA adheres with the basic structures for designing and analyzing different systems.

ALFAFA's systems are distinguished with numerous advantages, including:

- Easily learned, and customer quickly becomes familiar with usage.

- Advanced language of programmed.
- Mono and Multi usage
- Compatible with all common databases, namely Oracle, MS Access, MS- SQLSERVER..etc.
- Compatible with Windows additions (NT-98, 2000-2—3 XP).
- Data can be inverted to Microsoft applications (Word – Excel)
- Provide users with instructions in case of wrong or unauthorized operation .
- Have protection system of various levels, along with a system identifying the user's authority.
- Highly flexible , adaptable and extendable according to the client's requirement .
- Can be merged and integrated with each in favour of inclusive computerized projects.

2- Technical Support

ALFAFA hires a highly competent team of technical support to provide continuous service, to correct defects and troubleshooting during system computerization process , either through phone calls or Alfafa's website.

In brief, our client's support team consists of system engineers, customer's engineers, Administrators and management personnel. Each is dedicated to ensuring service to our clients. We provide a single point of contact that will respond to any questions or issue that may rise during our partnership.

As an option, this team can be dedicated to client's site to maintain closer contact with those directly responsible for providing clients with service and support.

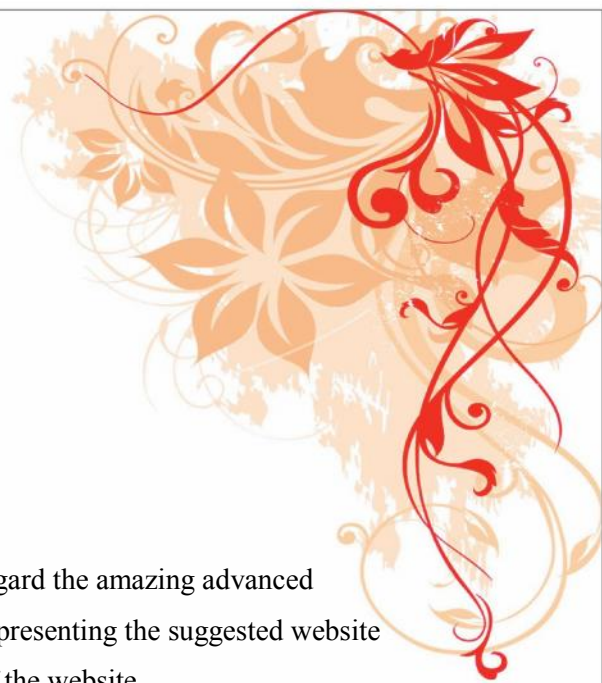

3- Management of Quality Systems

4- Advisory Services

5- Designing websites

For designing and setting up websites, Alfafa team depends on the following:

- Effective communications with agents in order to fulfill their requirements.

- Production of innovated designing, adopting, in this regard the amazing advanced technology of websites designing, and focusing on presenting the suggested website in new vision and innovative ideas to suit activities of the website.
- Utilization of state of the art technology in design software and tools for setting up websites, putting into consideration all efficient factors (quick browsing, harmony of colours, flexibility...etc) that produce a well-organized website.

Sixth: Periodic Maintenance Program

Alfafa provides periodic maintenance program for computer sets, printers, batteries and other file as follows:

- Runs preventive maintenance once a month for the targeted equipments, including cleaning, adjustment and review of operation programs.
- Responds to requests of the concerned firm to repair damaged equipments in a period not exceeding 24 hours. In emergency cases, requests are met promptly around the clock.
- Provides technical advices pertaining to methods of maintaining safety and usage of equipments.
